## Vermont Comprehensive Assessment Program (VTCAP)

## Test Specifications Spring 2024

The Vermont Comprehensive Assessment Program (VTCAP) is administered in the spring of each academic school year in the following subjects and grades:

- English Language Arts (ELA) Grades 3-9
- Mathematics Grades 3-9
- Science Grades 5, 8, and 11

The ELA and Mathematics assessments will assess the Common Core State Standards (CSSS) for English Language Arts and Mathematics, respectively. The Science assessment will assess the Next Generation Science Standards (NGSS).

Practice tests will be available in advance of the administration, with the following features:

- same item types as the operational assessment
- very similar content blueprint (percentage of points in each reporting category)
- similar total length/number of items (though note some practice tests may be divided into a different number of sessions than the operational assessment)
- TTS and ASL accommodations
- end of session directions as seen in the operational assessment

Specifications for the assessment in each subject area are provided on the following pages.

## ENGLISH LANGUAGE ARTS

## English Language Arts (ELA) Assessment: Grades 3-9

## Item Types

- MS-1 (Machine-Scored 1 point): 1 point; machine-scored multiple choice, multi-select, or technology-enhanced item interactions
- MS-2 (Machine-Scored 2 point): 2 points; machine-scored evidence-based selected response (two-part question; each part is a multiple-choice interaction), or technologyenhanced item interactions
- WP (Writing Prompt): 8 points; human-scored; single prompt/passage-based; two multi-trait rubrics - Written Expression and Conventions

All ELA items are associated with passages/stimuli. For Reading, a set of items is administered with a single or paired passage. For Writing and Language (machine-scored items), a set of items is administered with an error-embedded passage. For Listening, a set of items is administered with an audio stimulus. For the Writing Prompt, the prompt is presented with a paired passage.

## Operational Test Blueprint

The target distribution of content that will count towards student scores is presented in the table below.

| English Language Arts |  |  | Grades 3-5 |  | Grades 6-8 |  | Grade 9 |  |

|  | Level 1 | $15-25 \%$ |
|  | Level 2 | $40-60 \%$ |
|  | Level 3 | $15-35 \%$ |
|  | Total | $100 \%$ |

## Student Testing Experience

The ELA Assessment is administered as an adaptive assessment.
The number and types of items that will be administered to students are shown in the table below. Operational items count towards student scores, while field test items are "tryout" items that do not count toward student scores. The total number of items may vary slightly across administrations based on differences in the types of items associated with a passage set, e.g., MS-1 vs MS-2, but the total points determining the student score will always be the same.

## MATHEMATICS

## Mathematics Assessment: Grades 3-9

## Item Types

- MS-1 (Machine-Scored 1 point): 1 point; machine-scored multiple choice, multi-select, or technology-enhanced item interactions
- MS-2, MS-3 (Machine-Scored 2 point, 3 point): Grade 9 only; 2 or 3 points; machinescored; multi-part question composed of a combination of machine-scored interactions (multiple choice, multi-select, technology-enhanced)
- CR-3 (Constructed Response 3 point): Grades 3-8; 3 points; human scored; two trait rubric - 2 points Concepts and Procedures, 1 point Mathematical Practices
- CR-6 (Constructed Response 6 point): Grades 3-8; 6 points; human scored; two trait rubric - 4 points Concepts and Procedures, 2 points Mathematical Practices

## Operational Test Blueprint

The target distribution of content that will count towards student scores is presented in the tables below.

**Constructed response items (Grades 3-8) are scored for both Concepts and Procedures and Mathematical Practices. Across the 4 operational constructed response items in the test, a total of 6 points from the Mathematical Practices rubric are counted for the student's score.

## Grade 9

| Mathematics |  |  | Grade 9 |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  | Target \# Points | Target \% Points |

|  | Statistics and Probability |  | 6-10 | 13-20\% |
| Total |  |  | 45 | 100\% |

## MATHEMATICS

The target distribution of test points based on the Depth of Knowledge (DOK) of the machinescored items changes across grades.

| DOK | Percent of Test Points, <br> Grades 3-6 | Percent of Test Points, <br> Grades 7-8 | Percent of Test Points, <br> Grade 9 |
| :---: | :---: | :---: | :---: |
| Level 1 | $5-25 \%$ | $0-30 \%$ | $0-30 \%$ |
| Level 2 | $50-80 \%$ | $50-80 \%$ | $25-80 \%$ |
| Level 3 | $5-30 \%$ | $5-30 \%$ | $0-5 \%$ |
| Total | $100 \%$ | $100 \%$ | $100 \%$ |

Many of the mathematics items in the assessment are aligned to not only standards for Concepts and Procedures, but also Mathematical Practices. The proportion of test points also associated with various mathematical practices is shown in the table below. Note for grade 9, these are targets; if the target points are met the practices will be reported with testing results.

## SCIENCE

## Science Assessment: Grades 5, 8, 11

## Item Types

- MS-1 (Machine-Scored 1 point): 1 point; machine-scored; multiple choice, multi-select, or technology-enhanced item interactions
- MS-2 (Machine-Scored 2 point): 2 points; machine-scored; two-part question composed of a combination of two machine-scored interactions (multiple choice, multi-select, technology-enhanced)
- OE (Open Ended): 4 points; human-scored; holistic 0-4 score point rubric

All science items are multi-dimensional, aligning to at least two, if not all three, of the science dimensions (DCI, SEP, CCC) for the performance expectation.

Many science items are administered together in groupings called clusters, associated with a common phenomenon-based stimulus. Clusters are administered in all three science domains (Physical Sciences, Life Sciences, Earth and Space Sciences).

## Operational Test Blueprint

The target distribution of content that will count towards student scores is presented in the table below.

| Science Domain | Grade 5 |  | Grade 8 |  | Grade 11 |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Target \# <br> Points | Target \% <br> Points | Target \# <br> Points | Target \% <br> Points | Target \# <br> Points | Target \% <br> Points |
| Physical Sciences | $24-28$ | $40 \%$ | $20-24$ | $35 \%$ | $22-26$ | $35 \%$ |
| Life Sciences | $18-22$ | $30 \%$ | $20-24$ | $35 \%$ | $22-26$ | $35 \%$ |
| Earth and Space Sciences | $18-22$ | $30 \%$ | $18-22$ | $30 \%$ | $18-22$ | $30 \%$ |
| Total | 64 | $\mathbf{1 0 0 \%}$ | 64 | $100 \%$ | $\mathbf{6 8}$ | $100 \%$ |

Note items aligned to ETS standards are also assessed but because of the small number of standards in comparison to the total standards overall, ETS items are reported out within the reporting category for which the content domain matches the context of the design problem presented.

For Science, a Cognitive Complexity framework other than DOK is used. The framework rates the complexity of four indicators (stimulus, science and engineering practice, disciplinary core idea, crosscutting concept) as low, medium, or high. On a test form, all operational test points for each cognitive complexity level (low, medium, high) are summed across the four indicators. At least $10 \%$ of the points should be high cognitive complexity and no more than $35 \%$ of the points should be low cognitive complexity.
